PROFILE

Frontend Developer with 1 year 7 months of experience at PT Infomedia Nusantara (Telkom Indonesia Subsidiary). I specialize in React.js and micro frontend architecture (Single-SPA), working in the CRM Project Delivery team to customize and extend the Omnichannel CRM platform for various government and private sector clients. In addition to CRM customization, I also develop standalone modules to address specific client needs beyond the core product. A self-taught developer with a strong ability to learn quickly and adapt, I earned my Information Systems degree from the University of Indonesia.

WORK EXPERIENCE / PROJECTS

- **Frontend Developer at Infomedia Nusantara (Sep 2023 - current)**
 - Develop and customize the Omnichannel CRM platform to meet client requirements in government agencies and private enterprises.
 - Implement micro frontend architecture (Single-SPA) using React.js for scalable and modular applications.
 - Build standalone modules and custom features outside the core CRM product to address specific client needs.
 - Reduced unnecessary API calls by optimizing Redux state management, reducing multiple requests to just one, improving performance and load times.
 - Engineered an agent dispatch system for the Indonesian National Police's emergency service (110) and ambulance dispatch for the Indonesian Health Ministry (119).
 - Developed a Knowledge Management System for the Investment Ministry (BKPM) to streamline information sharing and access.
- **Tech Lead - Student Registration System Development [Feb 2022 - June 2022]**
 - Led a team in developing a Spring Boot-based information system for Pesantren Persatuan Islam 69 Matraman, enhancing their student registration process.
 - Oversaw the project lifecycle, ensuring the timely and successful delivery of high-quality software solutions.
 - Deployed the SpringBoot fullstack app to Heroku, automated it using Gitlab CI/CD.
- **Bangkit Capstone Project: NutriCare [May 2022 - June 2022] | [Link to repository](#)**
 - Developed NutriCare, an Android meal planner app built with Kotlin, as part of the Bangkit Academy 2022 Capstone Project.
 - Focused on integrating advanced features to improve user engagement and functionality.
- **Super Tic-Tac-Toe: Online Multiplayer Game [Nov 2024] | [Link to project](#) | [Link to repository](#)**
 - Developed an online Super Tic-Tac-Toe game with multiplayer functionality using Svelte.js
 - Implemented real-time gameplay using Firebase and WebSocket technology to ensure seamless user interactions.
 - Designed a responsive and intuitive user interface with pure CSS.
- **Teaching Assistant Coordinator of Data Structure and Algorithms [Feb 2023 - June 2023]**
 - Managed a team of teaching assistants and guided students through complex data structures and algorithms coursework at the University of Indonesia.
 - Created problem sets and automated scoring systems, enhancing the learning experience for over 100 students.
- **Teaching Assistant of Enterprise Application Architecture and Programming [Sep 2022 - Jan 2023]**
 - Mentored students in Enterprise Application Architecture and Programming, providing guidance on software design and development best practices.
 - Facilitated lab sessions and offered personalized support to students tackling complex projects.

EDUCATION

- Bachelor of Computer Science: University of Indonesia [Aug 2019 - Aug 2023]
 - GPA: 3.63/4.00
- Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka [Feb 2022 - July 2022]
 - Android Development

SKILLS

- Front End: Next.js, React.js, Svelte.js, Bootstrap, Ant Design, HTML, CSS, JS
- Back End: Spring Boot, Django, MySQL, PostgreSQL
- Programming Languages: Python, JavaScript, TypeScript, Java, Kotlin
- Other: Git, Figma, Postman
